### Abstract

In the original article, Equation (2) should read  $\mathbf{D}_r^{-1}\mathbf{P}_0\mathbf{D}_c^{-1} = \mathbf{UDV}^\top$  instead of  $\mathbf{P}_0 = \mathbf{UDV}^\top$ . The paragraph directly above Equation (2) should thus be reformulated as: "CA is based on the generalized singular value decomposition of the matrix  $\mathbf{D}_r^{-1}\mathbf{P}_0\mathbf{D}_c^{-1}$ , where  $\mathbf{P}_0 = \mathbf{P} - \mathbf{rc}^\top$  is the double centered matrix of interaction frequencies  $\mathbf{P}$ ."
