## Abstract

In the original article, Figure 7 has been erroneously replaced by Figure 6

<sup>1</sup>MARBEC, Univ Montpellier, CNRS, Ifremer, IRD, Sète, France, <sup>2</sup>Ifremer, LITTORAL, Dinard, France, <sup>3</sup>Univ. Rennes, Station de Bailleron, France, <sup>4</sup>Ifremer, LITTORAL, Arcachon, France, <sup>5</sup>Ifremer, DYNECO, Plouzané, France, <sup>6</sup>Ifremer, LITTORAL, Anglet, France, <sup>7</sup>DECOD (Ecosystem Dynamics and Sustainability), INRAE, Institut Agro, IFREMER, France, <sup>8</sup>MNHN, Dinard, France

In the original article, Figure 7 has been erroneously replaced by Figure 6. Figure 7 should read as follow:

**Figure 7** - Epifaunal biomass and density associated with *Z. marina* and *Z. noltei* habitats at the four sites and the three modalities during two seasons. Biomass in ash free dry mass per m2. Sites: DN: Dinard, GM: Golfe du Morbihan, AC: Arcachon, TH: Thau. Modalities: A: bare sediment in grey, D: dynamic in dark blue and S: stable in light blue. Mean  $\pm$  sd (N=3).
